

VAISHNAVI ARUMUGAM

Software Development Engineer | Java | Spring Boot | Microservices

Paris, France | +33-752504911 | srarumugam6@gmail.com | [linkedin.com/vaishnavi-a](https://www.linkedin.com/in/vaishnavi-a) | vaishnavi-portfolio.com

Software Engineer with 4+ years of experience driving the full software development life cycle (SDLC)—from design and REST/Web-service API implementation to automated testing and cloud deployment. Proficient in **Java (11/17/21), Spring Boot, Spring Data JPA, React, and containerized deployments using Docker and Kubernetes**. Demonstrated track record in high-availability backend microservices, relational/NoSQL database optimization (Oracle, PostgreSQL, MongoDB), peer code reviews, and production support within Agile teams.

PROFESSIONAL SKILLS

- **Backend:** Java (11/17/21), Spring Boot, Spring MVC, Spring Data JPA, Microservices Architecture, RESTful Service APIs
- **Frontend:** React, Angular
- **DevOps:** Docker, Kubernetes, Jenkins (CI/CD), Maven, Git, GitLab
- **Databases:** PostgreSQL, MongoDB, MySQL, Oracle, Elastic Search
- **Testing & Quality:** JUnit, Mockito, Automated Testing, Peer Code Reviews, Clean Architecture
- **Methodologies & Tools:** Full SDLC, Agile(Scrum), System Documentation, JIRA, AI Coding Assistance

EXPERIENCE

ERICSSON

Software Developer (Full-time + Internship)

Paris, France

08/2021 – 04/2026

Project: 5G Traffic Control and ECT Web Application, URe5 Robot Application

- Participated in all phases of the software development life cycle (SDLC)—design, coding, automated testing, and deployment—building high-availability microservices with Java, Spring Boot, and REST APIs to reduce latency by 80%.
- Engineered full-stack component updates (Java/Spring Boot backend, React/Angular UI), interacting with relational (Oracle, PostgreSQL) and NoSQL (MongoDB) databases.
- Conducted peer code reviews focused on business logic and design quality while authoring technical documentation for APIs, architectures, and system designs.
- Expanded automated test coverage using JUnit and Mockito, investigating production incidents to cut recurring defects by ~85%.
- Utilized Docker, Kubernetes, and Jenkins CI/CD pipelines to deploy containerized services into development and production environments.

Cognizant Technology Solutions

Java Developer

Chennai, India

05/2019 – 01/2020

Project: JB Hunt and Logistics

- Designed and built backend web-service APIs and Spring Data JPA persistence components, boosting business-logic execution speed.
- Structured relational database models (MySQL/PostgreSQL/Oracle), executing data integrity checks across core workflow modules.
- Wrote unit and integration test suites via JUnit/Mockito to ensure software maintainability and prevent production regressions.

EDUCATION

EPITA - Master of Science in Software Engineering | Paris, France | 09/2020 – 04/2022

- Coursework: Analysis of Algorithm, Web Technologies, Database Management, Project Management

Karpagam College of Engineering - B.E in Computer Science and Engineering | Coimbatore, India | 08/2015 – 04/2019

- Coursework: Data Structures, System Design, Operating system, Computer Networks

CERTIFICATIONS & PROJECT EXPERIENCES

- **IBM Full-Stack Certified Developer** • Served as a **Java Instructor @ EPITA** • Featured in **EPITA Journal** • **Scrum Master** experience in Agile environments • Cloud & DevOps Training (AWS Certification - On process)
- **Students Attendance System — Java, Spring Boot, MySQL, Angular**
 - Built a full-stack attendance platform with secure authentication and automated workflows.
- **Movie Application (Master's Project) — React, Node.js, Java, Spring Boot, MongoDB**
 - Developed a modular, responsive web application like Netflix with API-driven architecture.
 - Improved frontend performance by ~80% using optimized state management.
